

CLIENT-SIDE CONFIGURATION OF VEEAM CLOUD CONNECT

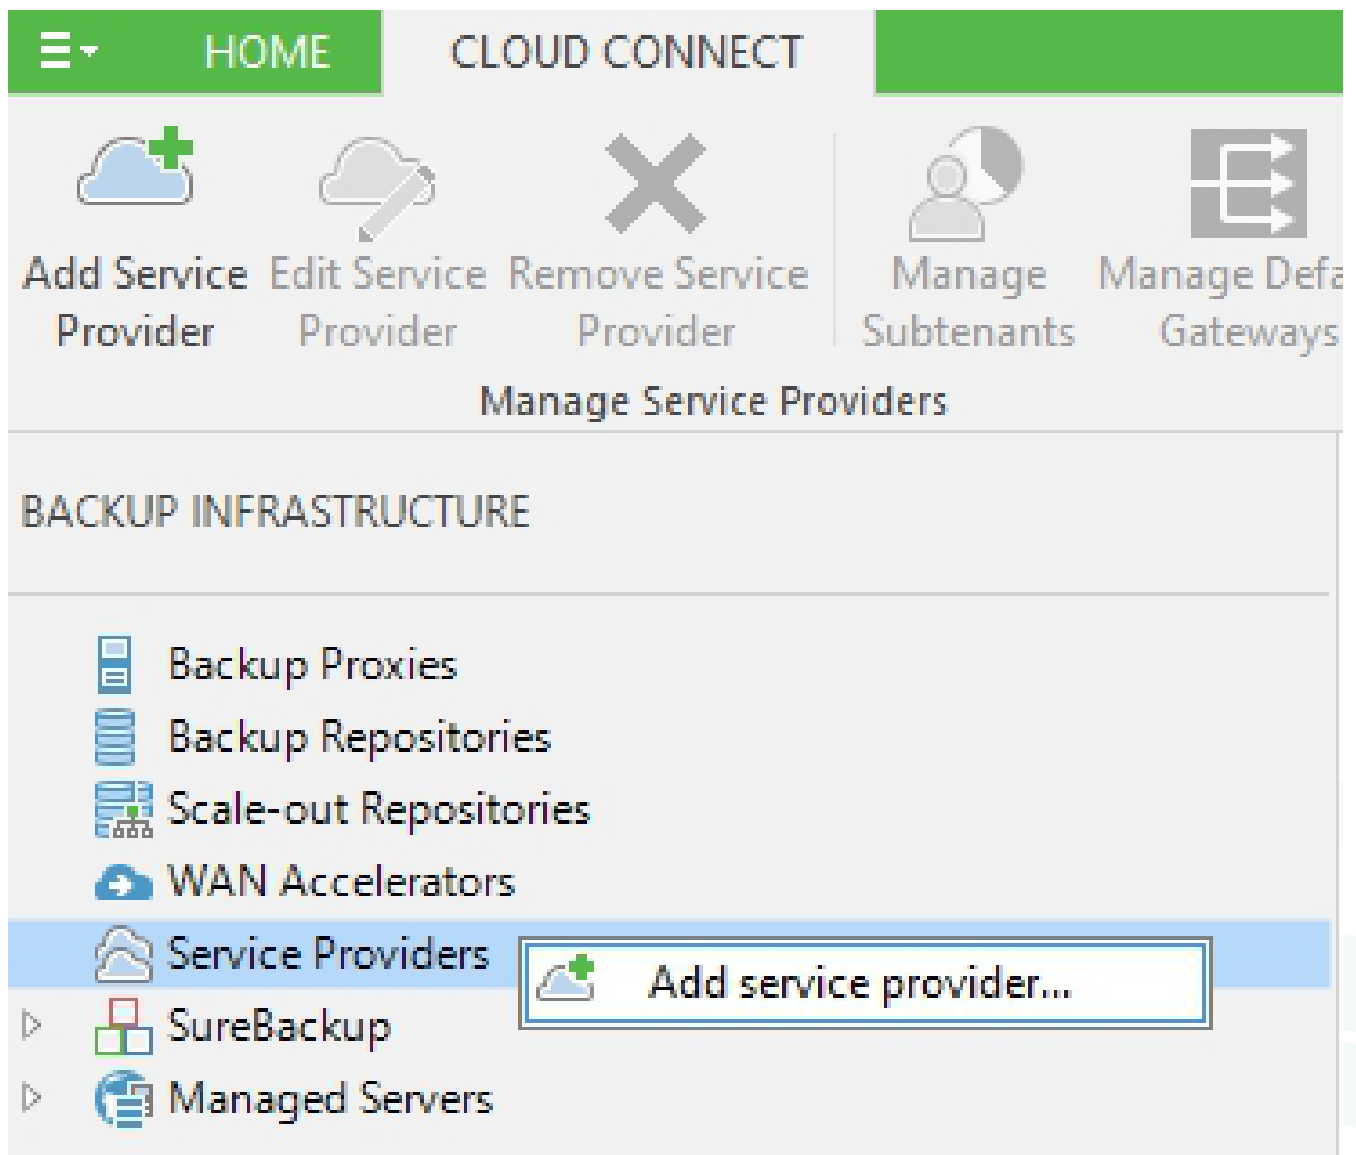

User Guide
May, 2017

Details:

Gateway: 10.50.41.44
username: VCC_nnnnnn
password: *****

Veeam Cloud Connect Configuration:

In the Veeam select the Cloud Connect and right click on Service Providers

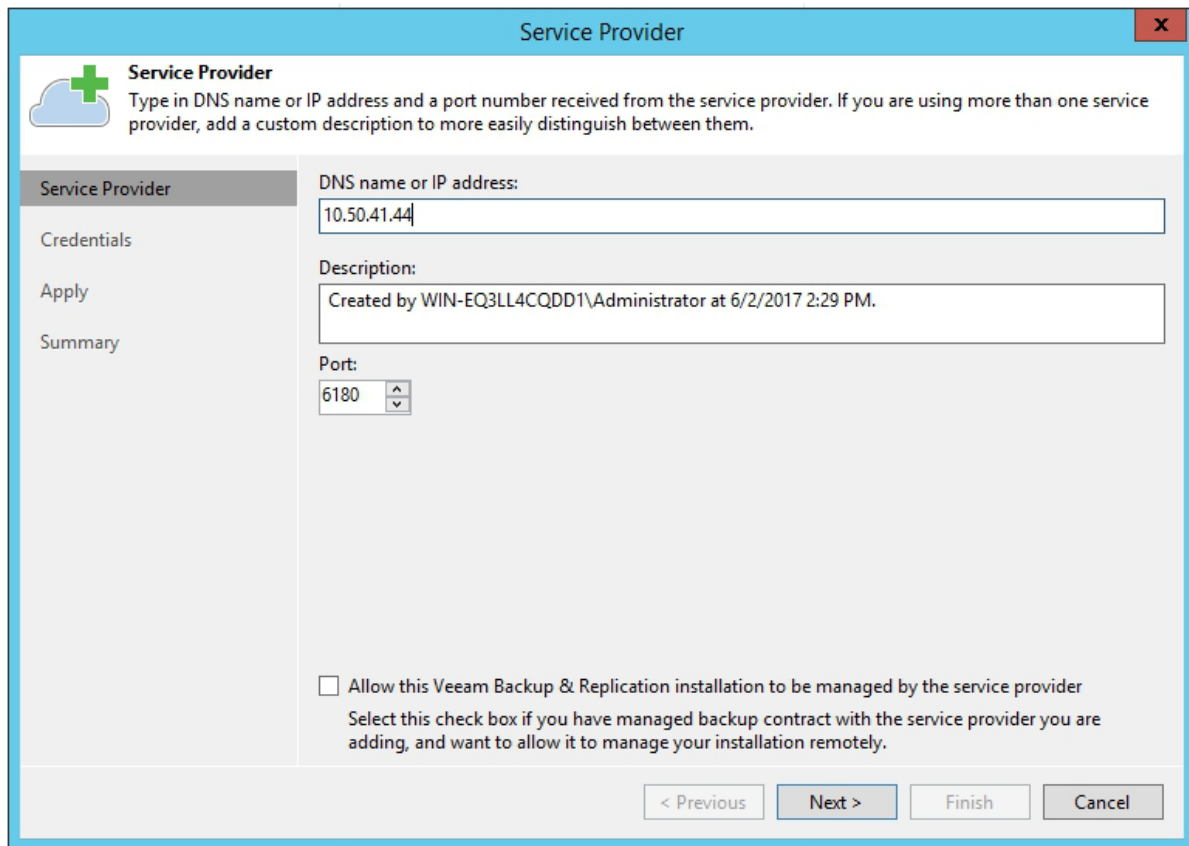

Click the Add Service Provider. At Service Provider tab fill with following:

DNS name or IP address: 10.50.41.44

Port: 6180 (default)

When finished, click "Next".

Service Provider

Type in DNS name or IP address and a port number received from the service provider. If you are using more than one service provider, add a custom description to more easily distinguish between them.

Service Provider

DNS name or IP address:
10.50.41.44

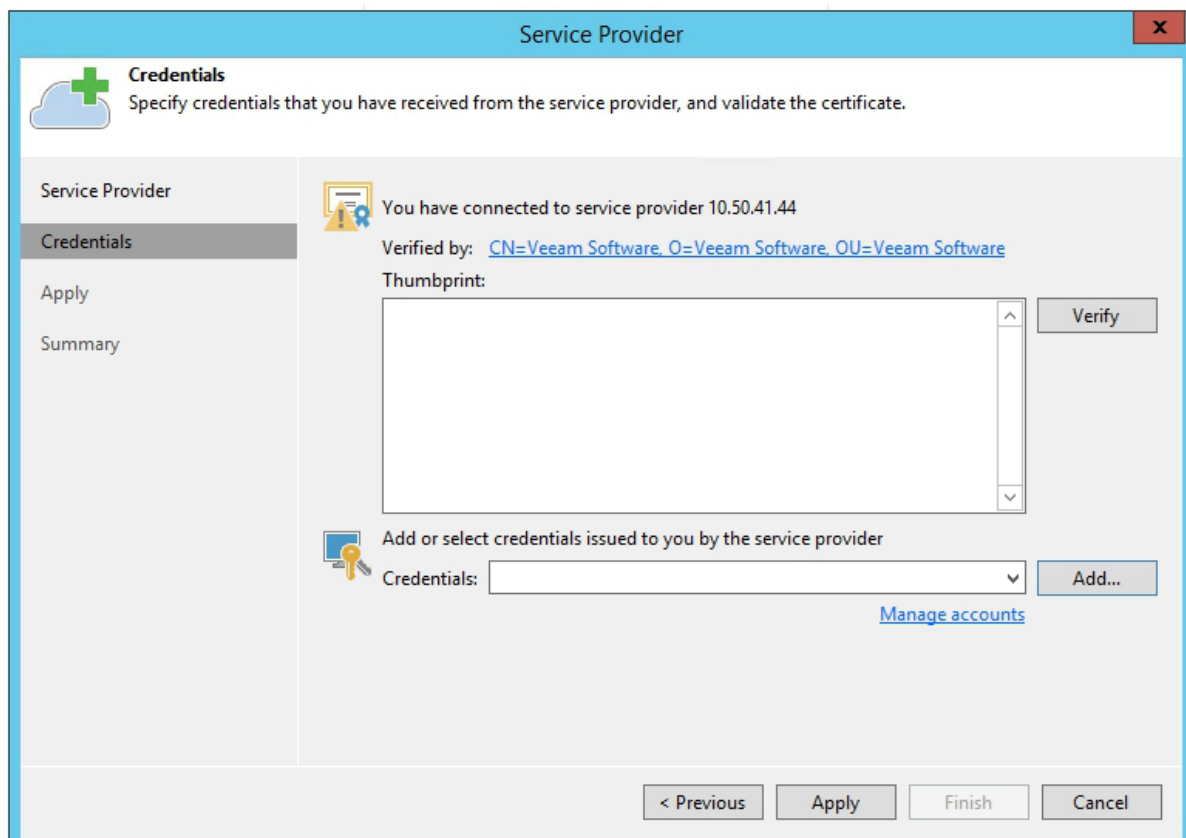

Description:
Created by WIN-EQ3LL4CQDD1\Administrator at 6/2/2017 2:29 PM.

Port:
6180

☐ Allow this Veeam Backup & Replication installation to be managed by the service provider
Select this check box if you have managed backup contract with the service provider you are adding, and want to allow it to manage your installation remotely.
